Bulletin

STOCK/SECTOR	NEWS	COMMENT	RATING
Bound And Beyond (BEYOND TB)	<p>During Thursday's analysts' briefing, management was confident that Bound And Beyond's two key properties – Four Seasons Hotel Bangkok at Chao Phraya River and Capella Bangkok – may support its 2023 topline revenue to reach a new target of THB2.95bn (+38% YoY), ie above its previous goal of THB2.8bn (+31% YoY). Room performance may achieve a targeted average occupancy rate (OR) of 55% (2022: 30%) while revenue per available rooms (RevPar) is now guided to hit of c.TH10,000 (2022: c.TH5,500). BEYOND's 3Q23 QTD OR ramped up to 55% (2Q23: 50%), with solid RevPar growth of 51% YoY, while F&B revenue grew a moderate c.9% YoY. Management also guided that momentum was strong in July and August, but looks set to turn seasonally soft in September.</p> <p>According to BEYOND, the 4Q23 high season also looks promising – this is based on the growing key source markets in the luxury segment, mainly from China (which contributes the most guest mix at 20%), followed by South Korea (12%) and the US (9%). The company's F&B and banquet revenues (47% of the revenue mix) may improve in 2H23 post the formation of the Government's new Cabinet, bringing back consumption and travel confidence. BEYOND also plans to open one new restaurant outlet inside the Four Seasons Hotel compound this year.</p> <p>Meanwhile, the company is planning to sell its another piece of land (2.77m sq m) in the northern province of Tak by 2024. A healthier outlook for its operating cash flow may also support BEYOND's new investment projects, ie the new F&B outlet. <i>(Company)</i></p>	<p>We expect BEYOND's 2Q23 core loss of THB113m to be this year's bottom and see momentum improving throughout 3Q23-4Q23. This follows the expected increase in foreign tourist arrivals that may benefit hotels' RevPar hikes and F&B outlet utilisation. Its 2H23 revenue may reach THB1.5bn vs THB1.43bn in 1H23, in our view.</p> <p>For 2024, the Tourism Authority of Thailand has set challenging goals of 35m and THB1.92trn in terms of international visitor numbers and receipts with 200m trips and THB1.08trn for domestic travellers and receipts. This implies that Thailand's total tourism receipts could bounce back to 2019's THB3trn by next year. We think the Government's focus on attracting quality tourist arrivals could also help BEYOND meet its customer targets.</p> <p>We expect average OR to continue rising to 65% in FY24 and stabilise at 70% in FY25. Hence, it is likely that the company's targeted THB3.5bn in revenue for 2025 may be reached earlier. Improving operating leverage may also help secure its profit margins growth. Consequently, we believe BEYOND's quarterly earnings may turn profitable in 3Q23 and ramp-up to its strongest quarter during 4Q23's high tourism season. We also hold the view that positive sentiment – with regards to the new Government's possible tourism stimulus measures – may act as the stock's near-term catalyst. We do not cover BEYOND at this time.</p>	NOT RATED

Top BUYs

	TP (THB)	Upside (%)	Catalysts
Advanced Info Service (ADVANC TB)	252	16.67	<ul style="list-style-type: none"> A further recovery in mobile revenue from higher roaming and prepaid sales (increased tourist flows). The earlier removal of fixed speed unlimited plans should mitigate the pressure on ARPU from weaker economic sentiment Sustained double-digit growth in the fixed broadband or FBB segment on higher homes passed (strengthened further by the acquisition of TTT Broadband) The potential monetisation of its tower assets looks to be share price catalyst in the mid- to longer-term Key downside risks are competition, weaker than expected earnings and political/economic headwinds
Airports of Thailand (AOT TB)	82	13.10	<ul style="list-style-type: none"> Flights between Thailand and China slated to ramp up to 430 per week (one-third of 2019 levels) from Jun onwards (from 100 weekly flights in May) has unlocked the travel bottleneck Suvarnabhumi Airport's (BKK) new Satellite Terminal opening in Sep 2023 may drive AOT's earnings from FY24 onwards Long-term upsides; i) Plans to boost non-aeronautical revenues to 50% from c.45% currently, ii) the idea of PSC collections for air transit/transfer passengers, iii) expansions of BKK and Don Mueang, and iv) the planned transfers of three airports to AOT Earnings turnaround to THB11.5bn in FY23F, with aircraft and passenger numbers at 74% and 67% of 2019's levels vis-à-vis FY22's 44% and 33%
Bangkok Dusit Medical Services (BDMS TB)	35.25	25.89	<ul style="list-style-type: none"> 2H23 net profit may improve HoH, on the continued return of Thai and foreign patients to its hospitals. BDMS may see growing numbers from the Middle East and China – the latter should provide additional support for earnings growth, aside from the solid income already coming from hospital billings for China expatriates. 3Q23 earnings may grow YoY and QoQ from the high season for medical treatments BDMS targets a 3-year organic revenue of 6-8% CAGR (2022-2025) and superior 23-24% EBITDA margin – to be driven by more revenue intensity and case mix (ie fly-in patients and Centres of Excellence). BDMS is looking to increase market share in Social Security and enhance health insurance revenues for Thai and expatriate patients. Expect healthy core profit expansion by 6% in 2023. Stable bed occupancy rates vs 2022's 73% (including COVID-19 treatments) are assumed. Profit margins may jointly benefit from patients and price intensity.
Bangkok Expressway and Metro (BEM TB)	11.22	29.71	<ul style="list-style-type: none"> After schools and universities' new academic years began in May, average expressway traffic crawled up while average weekday traffic marked a bit higher number. While January to June numbers were still below their comparable months during FY19's pre-pandemic period, this may imply that there is ample room (more than 10%) for BEM's expressway traffic to improve. Similar to expressway traffic numbers' upwards direction, Blue Line Mass Rapid Transit (MRT) ridership also rose at a stronger growth rate. Note: June's ridership grew 10% MoM. Contrary to the expressway traffic levels, ridership numbers from January to June were higher than FY19 numbers – every single month. We expect BEM to post new ridership number highs within the remainder of 2023. For FY23, we think traffic and ridership numbers should strengthen in 2H23. Expressway traffic should continue to crawl up to pre-pandemic levels (>1.2m trips/day) while Blue Line MRT ridership ought to hit new high records (likely in 4Q23).
Central Pattana (CPN TB)	85	23.64	<ul style="list-style-type: none"> Benefits from the normalising rental rate discounts given to mall tenants and rising customer traffic to CPN's malls at tourism destinations Secured new project openings this year, including two retail malls, seven hotels, and seven residential sites. The opening of the Central WestVille mall (32,000sq m) in 4Q23 and scheduled transfers of c.THB2.5bn residential units (mainly high-rise projects) in 2H23 to strengthen 2H23F earnings Positive to a clarity on the renewal of lease terms and contracts of two shopping malls with CPN Retail Growth Leasehold REIT or CPNREIT 2023F core profit to grow strongly by 18% YoY – beating pre-COVID-19 levels, while 3Q23F earnings may expand both YoY and QoQ
Central Retail Corp (CRC TB)	54	30.91	<ul style="list-style-type: none"> Performance of fashion and leasable property segments to bring revenue back to pre-pandemic levels, and improve the profit margin expansions Sales from international tourists is at >10%, beating 2019's c.5%, and this momentum may improve throughout the rest of 2023, to be driven by an increasing Chinese arrivals A better outlook for the headline unit in 2H23F on the aggressive opening of 10 Thai Watsadu stores, healthier sales momentum of Ngyuen Kim appliance stores in Vietnam post its business restructuring, and utility costs optimisation Expect 19% core profit growth in 2023, while 3Q23F earnings may expand YoY

Top BUYs

	TP (THB)	Upside (%)	Catalysts
CP All (CPALL TB)	76	16.48	<ul style="list-style-type: none"> Convenience store or CVS traffic is strongly benefiting from the rebound in out-of-home activities and foreign tourist arrivals, supporting a better product mix on high GPM food and personal care sales CPALL's 2H23F outlook is still attractive, and the CVS business may remain its key growth driver. Support factors: i) The ongoing Chinese tourism recovery, ii) decreasing electricity costs, iii) on-track openings of new 7-Eleven CVS stores (and acceleration in Makro and Lotus's new stores vs 1H23) CPAXT's completion of debt restructuring in April may lower CPALL's average interest rates and interest expenses, and limit currency risks after paying off USD loans Expect robust earnings growth of 34% (78% of pre-pandemic levels) and 22% YoY in 2023 and 2024
Land and Houses (LH TB)	10.85	30.72	<ul style="list-style-type: none"> Due to limited activities of launching new projects and none of these new projects commanding strong presales since their respective launches, the company showed a weak performance in 1H23, especially in terms of presales and transfers based on 22% of its overall new project value being launched within 1H23 under its FY23 plan (THB35bn) As new project launches for F23 will be heavily loaded in 4Q23, we expect the company's presales to follow suit in tandem with these new launches. Likewise, there should be a likely trend of presales hitting FY23's highest quarter in 4Q23 when LH launches 78% of its full-year plan to unveil new projects within 2H23 Its presales speed can step up when a new condominium project will be launched in 4Q23. We also expect the Vive brand in the SDH segment to be launched in 3Q23 to attract solid demand from the high-end market Up to now, LH remains committed to its plan to sell two Grand Centre Point hotels in Pattaya to a REIT within 4Q23. As these two hotels have performed superbly in terms of average room and occupancy rates (>90% on average), we think the company will secure this opportunity to record extra gains from the spinning-off of these two hotels by 4Q23
PTT Exploration & Production (PTTEP TB)	186	17.35	<ul style="list-style-type: none"> OPEC+ recently announced huge production cuts of 1.15mbpd, starting from May 2023 till year's end. This is a positive surprise and should strongly enhance oil prices in 2023 Gas sales volumes in 2023 are likely to improve and should be in the range of 470-510kboed vs 468kboed in 2022. The Erawan G1/61 site, which previously had issues with site access, is now seeing more developments, as the company has sited eight production rigs there. Production should therefore increase from 200mmcf in 2022 to 600mmcf by the end of the year China and India are the largest growth demand factors in 2023 on the back of a recovery in transportation and industrial fuel demand. It will take some time before the impact of China's re-opening of borders is fully recognised – this may gather momentum in 2Q23-3Q23, and we expect an oil supply deficit in 2023
Siam Commercial Bank (SCB TB)	150	27.12	<ul style="list-style-type: none"> We fine-tune our FY22F-23F earnings to in line with FY22's financial targets. Net-net, earnings will rise 3.4% for FY22F and fall by 3.2% for FY23F post assumptions of lower loan growth and higher opex despite elevated non-ll and credit costs. Our TP stays at THB150. We maintain our 2% ESG premium based on RHB's proprietary methodology
Sino-Thai Engineering & Construction (STEC TB)	16.20	35.00	<ul style="list-style-type: none"> Based on the current political situation, we expect almost all prioritised infrastructure projects listed by the Transport Ministry to be delayed until we get a new post-election government. The bulk of these involve rail transits, which should be an advantage for the large construction players including STEC The Red Line MRT extension and three new double-track railway lines can be actually executed in terms of the bidding process within this year, in our view Without any new infrastructure bids, we expect limited impacts on STEC which have moderate amounts of orderbooks on hand cushioning the vacuum in public sector bidding activities and an uptrend of GPM. For STEC, it is monopolising the mega-sized c.THB27bn U-Tapao International Airport's expansion, which is likely to be awarded soon

RHB Guide to Investment Ratings

Buy:	Share price may exceed 10% over the next 12 months
Trading Buy:	Share price may exceed 15% over the next 3 months, however longer-term outlook remains uncertain
Neutral:	Share price may fall within the range of +/- 10% over the next 12 months
Take Profit:	Target price has been attained. Look to accumulate at lower levels
Sell:	Share price may fall by more than 10% over the next 12 months
Not Rated:	Stock is not within regular research coverage

The term "RHB" shall denote, where appropriate, the relevant entity distributing or disseminating the report in the particular jurisdiction referenced below, or, in every other case, RHB Investment Bank Berhad and its affiliates, subsidiaries and related companies.

RESTRICTIONS ON DISTRIBUTION

Malaysia

This report is issued and distributed in Malaysia by RHB Investment Bank Bhd. The views and opinions in this report are our own as of the date hereof and is subject to change. If the Financial Services and Markets Act of the United Kingdom or the rules of the Financial Conduct Authority apply to a recipient, our obligations owed to such recipient therein are unaffected. RHB Investment Bank Bhd has no obligation to update its opinion or the information in this report.

Thailand

This report is issued and distributed in the Kingdom of Thailand by RHB Securities (Thailand) PCL, a licensed securities company that is authorised by the Ministry of Finance, regulated by the Securities and Exchange Commission of Thailand and is a member of the Stock Exchange of Thailand. The Thai Institute of Directors Association has disclosed the Corporate Governance Report of Thai Listed Companies made pursuant to the policy of the Securities and Exchange Commission of Thailand. RHB Securities (Thailand) PCL does not endorse, confirm nor certify the result of the Corporate Governance Report of Thai Listed Companies.

Indonesia

This report is issued and distributed in Indonesia by PT RHB Sekuritas Indonesia. This research does not constitute an offering document and it should not be construed as an offer of securities in Indonesia. Any securities offered or sold, directly or indirectly, in Indonesia or to any Indonesian citizen or corporation (wherever located) or to any Indonesian resident in a manner which constitutes a public offering under Indonesian laws and regulations must comply with the prevailing Indonesian laws and regulations.

Singapore

This report is issued and distributed in Singapore by RHB Bank Berhad (through its Singapore branch) which is an exempt capital markets services entity and an exempt financial adviser regulated by the Monetary Authority of Singapore. RHB Bank Berhad (through its Singapore branch) may distribute reports produced by its respective foreign entities, affiliates or other foreign research houses pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Where the report is distributed in Singapore to a person who is not an Accredited Investor, Expert Investor or an Institutional Investor, RHB Bank Berhad (through its Singapore branch) accepts legal responsibility for the contents of the report to such persons only to the extent required by law. Singapore recipients should contact RHB Bank Berhad (through its Singapore branch) in respect of any matter arising from or in connection with the report.

United States

This report was prepared by RHB is meant for distribution solely and directly to "major" U.S. institutional investors as defined under, and pursuant to, the requirements of Rule 15a-6 under the U.S. Securities and Exchange Act of 1934, as amended (the "Exchange Act") via a registered U.S. broker-dealer as appointed by RHB from time to time. Accordingly, any access to this report via Bursa Marketplace or any other Electronic Services Provider is not intended for any party other than "major" US institutional investors (via a registered U.S broker-dealer), nor shall be deemed as solicitation by RHB in any manner. RHB is not registered as a broker-dealer in the United States and currently has not appointed a U.S. broker-dealer. Additionally, RHB does not offer brokerage services to U.S. persons. Any order for the purchase or sale of all securities discussed herein must be placed with and through a registered U.S. broker-dealer as appointed by RHB from time to time as required by the Exchange Act Rule 15a-6. For avoidance of doubt, RHB reiterates that it has not appointed any U.S. broker-dealer during the issuance of this report. This report is confidential and not intended for distribution to, or use by, persons other than the recipient and its employees, agents and advisors, as applicable. Additionally, where research is distributed via Electronic Service Provider, the analysts whose names appear in this report are not registered or qualified as research analysts in the United States and are not associated persons of any registered U.S. broker-dealer as appointed by RHB from time to time and therefore may not be subject to any applicable restrictions under Financial Industry Regulatory Authority ("FINRA") rules on communications with a subject company, public appearances and personal trading. Investing in any non-U.S. securities or related financial instruments discussed in this research report may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the U.S. Securities and Exchange Commission. Information on non-U.S. securities or related financial instruments may be limited. Foreign companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in the United States. The financial instruments discussed in this report may not be suitable for all investors. Transactions in foreign markets may be subject to regulations that differ from or offer less protection than those in the United States.
