## **CH Karnchang** (CK TB)

Busy As a Beaver; Still BUY

- Maintain BUY and THB25 TP (SOP), 40% upside and c.2% yield. Following
  our recent review of CH Karnchang's solid results for 3Q24, we are keen to
  highlight the viability of its earnings prospects for the next five years, which
  are already supported by the abundant orderbooks on hand and the high
  chances of being awarded new infrastructure projects soon. Compared to
  its large peers, CK's performances and growth seem to be more secured.
- Within the company's highest-ever orderbook on hand worth c.THB220bn, there are currently four major infrastructure projects to determine its earnings performance for next five years: i) Two construction contracts of Purple Line Mass Rapid Transit (MRT) plus mechanical & engineering (M&E) works, ii) two contracts for double-track railway (Denchai-Chiang Khong), iii) Luang Prabang Hydropower project, and iv) construction works for Orange Line MRT extension to the western side of Bangkok plus M&E installation work for the entire route. Apart from these major projects, there are also more than 20 smaller existing projects to be recognised as revenue. In addition, there is a likely chance for the construction work of a double-deck section within the expressway network (worth THB35bn) to be awarded to CK in 1H25. Therefore, the company's revenue growth seems to be secured.
- The Luang Prabang Hydropower project, with a total development period as long as 10 years ending in FY30, has proven to be the most critical factor to boost CK's core revenue. Currently, this project is recognised as providing revenue within the range of THB4-5bn per quarter or about half of the total construction revenue. This project is about 37% completed and has entered the acceleration phase. We expect the project's construction progress to slow down from FY27 onwards when it approaches the final stages. Hence, the Luang Prabang Hydropower project should help sustain CK's revenue momentum until FY27.
- The Orange Line MRT project, which involves the track extension to the west side of Bangkok and M&E installations, will also help support CK's medium-term revenue visibility. As the recently awarded project is currently at the early stage, the construction progress is expected to reach a mere 10% by FY25-end, before moving forward quickly from FY26 onwards. However, more than 50% of the M&E installation contract value should be recognised in FY25-FY27. As it sub-contracts the construction job partially to other companies, CK's GPM should stay unchanged at 7-8%.
- Valuation. As CK's ESG score of 2.6 is below the country median, we applied
  a 12% ESG discount to derive our SOP-based TP. By including the fair value
  of investment in three SET-listed companies, our TP stays at THB25. Key
  risks: Delays in project launches and construction materials' price volatility.
