Temporary Quarterly Earnings Decline; Keep BUY

• Keep BUY and THB171 TP, 25% upside, c.7% yield. We anticipate PTT Exploration & Production to report weak 3Q24 net profit - primarily impacted by higher unit costs on an increased proportion of oil sales, softer crude oil prices, and lower sales volumes QoQ. However, we view this as a temporary setback. We believe sales volumes are projected to rise by 12% QoQ, reaching a new high in 4Q24, with unit costs set to normalise. Looking ahead, PTTEP guided on strengthening FY25F-26F earnings, supported by 5% and 2% sales growth amid a favourable oil price environment.

• A weak 3Q. We estimate 3Q24 net profit at THB16.2bn (-11% YoY, -33% QoQ). Excluding an FX gain of THB1bn, hedging gain of THB330m, and a THB1bn asset write-off from Block 12 (Mexico), recurring earnings are expected at THB15.8bn (-16% YoY, -32% QoQ). PTTEP guided on an earnings decline is due to a 6% YoY (+9% QoQ) increase in unit cost to USD30.80/boe, driven by higher oil sales proportion, as well as a 4% QoQ drop in sales volume to 487kboed - mainly from reduced output at the G1/61, G2/62, Contract 4, and Algeria projects. We think ASPs will fall 3% YoY to USD47/boe, with liquid prices down 4% to USD78.50/boe.

• Recovery expected from higher sales volume and improving oil prices. The 3Q24 bottomline dip appears temporary, in our view, with sales volume projected to reach a new high of 540kboed (+12% QoQ) in 4Q24, driven by seasonality and production recovery post shutdowns at the G1/61, G2/61, and Contract 4 projects. Unit costs should normalise as gas sales increase. PTTEP guided for a FY25F-26F earnings improvement, supported by 5% and 2% sales growth, along with a favourable oil price environment.

Oil price gaining momentum from September's low. Oil prices are expected to rise amid escalating tensions between Israel and Iran, with potential disruptions to supply if the latter's oil production is impacted. While Iran's average production of 3.2mbpd YTD could be offset by OPEC's 6.4mbpd spare capacity (primarily from Saudi Arabia and the United Arab Emirates), we still anticipate upwards pressure on prices. We maintain our Brent crude price forecast at USD 82-80/bbl for 2024-2025.

Source: Bloomberg

With the stock trading at a low 1x P/BV and 7.5x PE for 2025 - below historical averages - downside risks are minimal. PTTEP also offers an attractive dividend yield of 6.5-7.1% for FY24F-26F. Our DCF-based TP of THB171 includes a 2 % ESG premium, based on a 3.3 ESG score (ie above the 3.2 country median). One risk we see is delays in accessing the Mozambique LNG project, which could lead to a further impairment loss in 4Q24, ie similar to the USD120m booked in 4Q23.

Overall ESG Score: 3.3 (out of 4)

E: GOOD

Being dependent on the oil & gas business, PTTEP has the highest exposure to this ESG pillar. However, it aims to achieve more environmental operations such as increasing the usage of green suppliers. PTTEP has various initiatives in place to monitor and minimise its environmental externalities

S: EXCELLENT

PTTEP applies PTT's and international standards per those specified by Dow Jones Sustainability Indices and the United Nations Sustainable Development Goals. It also conducts social responsibility activities based on three principles: i) Activities linked to its mission and operations, ii) using its own expertise and potential, and iii) engaging in projects that are suitable for society's needs

G: EXCELLENT

PTTEP follows the guidance of PTT, whose corporate governance score from the Thai Institute of Directors is among the highest in the country. Its disclosure policy is in compliance with regulations set by the SET. As it is a listed energy company, PTTEP also discloses important information broadly and promptly to stakeholders

Emissions And ESG

Trend	

PTTEP's emissions data from 2020 to 2023 reflects a mixed trend. There was an initial decrease of approximately 4.45% in emissions from 2020 to 2021 due to operational adjustments and regulatory compliance efforts. However, this was followed by notable increases in emissions, with a rise of about 10.91% from 2021 to 2022 and a further increase of approximately 18.11% from 2022 to 2023. These subsequent increases are attributed to factors such as expanded production volume and heightened energy demands.

Latest ESG-Related Developments

- PTTEP plans to achieve net zero greenhouse gas (GHG) emissions by 2050 through the EP Net Zero 2050 concept. In 2023, it reduced accumulated GHG emissions by approximately 2. 4m tCO2e vs the base year of 2020.
- Looking forward, one crucial initiative to reduce GHG is the carbon capture storage project at Arthit Field in the Gulf of Thailand. Currently, the front-end engineering design has been completed, and it is expected to be operational in 2027. This project aims to reduce carbon dioxide emissions from the production process by approximately 0. 7 to 1.0 m tCO2e pa.
