dividend yield. Before the festive season kicks off in the year-end, Bangkok Expressway & Metro has already recorded strong expressway traffic and MRT Blue Line ridership numbers for November. These confirm that its core businesses will book robust numbers for 4Q24.
 With expressway traffic being at mature levels over the past two years,

• Maintain BUY and SOP-based TP of THB12, 62% upside with 2% FY24F

BEM's traffic numbers were flat YoY in November, at 1.14m trips per day (-0.1% YoY, +2.9% MoM). Ridership data for November may be the highest for the year, as there was a full month of strong commuting activities – likely still in effect – before the holiday period kicks in, in the last week of December. Last month, average daily revenue dipped slightly MoM to THB26.2m, but rose by 0.4% YoY. BEM's expressway traffic growth has trended sideways YTD, while 11M24 average daily traffic numbers were also flat YoY at 1.12m trips (+0.03%YoY). Seasonal factors indicate that traffic may drop MoM in December, due to the year-end festive season. As such, we maintain FY24F expressway traffic at 1.1m trips per day.

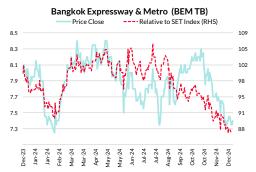

- MRT Blue Line ridership data should be more exciting. Its Nov 2024 ridership was at 463K trips per day (+7% YoY, +4% MoM), marking a new high for this mass rapid transit (MRT) route. Farebox revenue for the month rose to THB13.8m/day (+17% YoY, +4% QoQ). Apart from seasonal factors that are similar to that for expressway traffic, the MRT Blue Line also benefited from: i) An uptrend in average MRT Yellow Line ridership (currently at >40K/day) - this line feeds a large portion of passengers to the MRT Blue Line; ii) 15 meetings, incentives, conferences and exhibitions or MICE events that were held at Queen Sirikit National Convention Centre (an MRT Blue Line station is near this venue); and iii) more people commuting to new mixed-use real estate projects along the route, especially near the Lumpini station. 11M24 ridership average rose 9.7% YoY to 427K trips/day. For December, the MRT ridership may either be flat or grow slightly MoM, as we expect to see an increase in foreign visitor arrivals to Bangkok and as festive season activities ramp up. Note that the Red Cross Fair held on 11-22 Dec 2024 will be a factor boosting BEM's Dec 2024 ridership at the Silom and Lumpini stations. Premised on this, we maintain our FY24 MRT ridership assumption at 430K trips/day (+10.2% YoY).
- On a YTD basis, BEM's earnings growth has been mainly driven by the Blue Line MRT while mature traffic levels on its expressways should be the bedrock of the group's earnings. We make no change to our FY24 net profit growth assumption of 10% YoY.
- Our THB12 TP includes an unchanged 2% ESG premium, based on BEM's 3.3 ESG score, which is above the country median.

Overall ESG Score: 3.3 (out of 4)

E: GOOD

Expressway users are provided with convenient, fast, safe services, by which the economic losses caused by fuel burning (stemming from traffic congestion) can be minimised. Meanwhile, BEM's metro system is an ecofriendly public transport system that consumes clean energy, helps minimise air pollution, and reduces greenhouse gas and carbon dioxide emissions.

S: EXCELLENT

BEM's CSR activities help to address the impact its business has on communities and the society. It also participates in helping to develop and maintain the well-being of communities. Its guidelines for operations on care for and collaborations in community development are divided into three target groups: i) Origin (communities surrounding the workplaces), ii) middle-way (communities along the service routes), and iii) destination (society as a whole).

G: EXCELLENT

The structure and agility of BEM's governance is essential to ensure consistency in: i) Strategic risk management; and ii) giving critical, accurate and timely information throughout the entire IT governance system. This is so that BEM can maximise efficiency in managing resources, in response to the ever-changing business environment.

Emissions And ESG

Trend analysis

BEM collected GHG emissions data from its expressway and MRT businesses in FY23, and started disclosing its Scope 3 emissions in the same period. Other indirect GHG emissions (Scope 3) include Category 1 – purchased goods and services, Category 3 – fuel & energy-related activities, Category 5 – waste generated in operations, Category 7 – employee commuting, and Category 13 – downstreamleased assets. Between the two businesses, MRT accounted for the majority of BEM's GHG emissions, ie over >75% of Scope 1 and >90% of Scope 2 and 3 emissions. The higher numbers in FY23 were related to the increase in MRT ridership and expressway traffic.

Latest ESG-Related Developments

- BEM aims to be carbon neutral by 2050, and has put in place procedures for managing waste from various activities for efficient waste disposal, including recycling for reuse.
- BEM promotes the optimal use of resources and environmental impact reduction from internal
 processes, both directly and indirectly, among its staff and contractors. Such initiatives are to
 be extended to service users, the society, and communities along the metro and expressway
 routes through environmental promotion activities. The company looks to promote
 environmental awareness in society and communities to reduce air pollution.

DISCLOSURE OF CONFLICTS OF INTEREST

RHB Investment Bank Berhad, its subsidiaries (including its regional offices) and associated companies, ("RHBIB Group") form a diversified financial group, undertaking various investment banking activities which include, amongst others, underwriting, securities trading, market making and corporate finance advisory.

As a result of the same, in the ordinary course of its business, any member of the RHBIB Group, may, from time to time, have business relationships with, hold any positions in the securities and/or capital market products (including but not limited to shares, warrants, and/or derivatives), trade or otherwise effect transactions for its own account or the account of its customers or perform and/or solicit investment, advisory or other services from any of the subject company(ies) covered in this research report.

While the RHBIB Group will ensure that there are sufficient information barriers and internal controls in place where necessary, to prevent/manage any conflicts of interest to ensure the independence of this report, investors should also be aware that such conflict of interest may exist in view of the investment banking activities undertaken by the RHBIB Group as mentioned above and should exercise their own judgement before making any investment decisions.

In Singapore, investment research activities are conducted under RHB Bank Berhad (through its Singapore branch), and the disclaimers above similarly apply.
