### Top Story

**LPN Development (LPN TB, SELL, TP: THB3.00)**

A Glimmer Of Hope; Maintain SELL

Company Update

Maintain SELL and THB3.00 TP, 34% downside and c.8% yield. While the bulk of Thailand's low-rise developers can maintain their strong momentum for single-detached house and townhouse presales in 3Q20 – continuing from 2Q20 – LPN Development has shown QoQ weaker presales numbers on a QTD basis. This is as low-rise projects account for only 18% of its available-for-sale projects portfolio. Hence, the pressures from the condominium market still dominates its overall performance.

### Regional Research

**Plantation (NEUTRAL)**

Are Current CPO Prices Sustainable?

Regional Sector Update

Still NEUTRAL with Top Picks: IJM Plantations, Wilmar International and Astra Agro Lestari. Despite the recent CPO price rally, share prices have not reacted. This is likely due to expectations that the current CPO price is unsustainable. We continue to caution of a pullback in prices on peak output and post-festive demand in 4Q20F, especially in view of CPO's small discount to soybean oil currently.

<b>Advance Info Service (ADVANC TB)</b>	220.00	25.00	<ul style="list-style-type: none"> <li>Outlook should continue to recover with cost management on focus. While we expect the normalisation of prepaid segment demand, subs acquisition activities and easing competition to gradually drive topline to recovery in 2H20, we think a value-to-money strategy through a bundling package should continue to yield additional revenue to the group</li> <li>The toning down of capex guidance should ease investor concern over the imminent margins pressure. We expect the impact from the roll-out of 5G network to be limited, as it should be partially absorbed by network cost saving initiative, staggered payment profile, and tax incentive scheme</li> </ul>
<b>Bangkok Chain Hospital (BCH TB)</b>	17.50	19.86	<ul style="list-style-type: none"> <li>We still expect to see robust COVID-19 screening services demand throughout 2H20 on the continuous return of students studying abroad, migrant workers, and business travellers after border restrictions are relaxed. The doubling of its capacity under the alternative state quarantine should boost upside from this new revenue stream and bolster FY20 earnings</li> <li>We expect to see strong 2H20 recovery in SSO revenue, driven by the resumption of pent-up demand from high-cost care, trauma, and dental services. We also think global budget disbursements could bring further upsides this year, thanks to relatively lower insured patients traffic during COVID-19</li> </ul>
<b>Berli Jucker (BJC TB)</b>	45.00	21.62	<ul style="list-style-type: none"> <li>Improving sales for Berli Jucker's modern retail business, based on full-quarter operations in 3Q20 for the non-food segment, and smaller B2B sales. These factors should also benefit profit margins</li> <li>Average occupancy rates at Big C's leasable areas rebounded to &gt;90% from an 83% bottom in April, with less rental rate discounts given to tenants, as the bulk of its malls are in non-tourist destinations</li> <li>Non-retailing businesses (c.30% of sales) remain in an uptrend</li> </ul>
<b>Central Pattana (CPN TB)</b>	56.00	29.48	<ul style="list-style-type: none"> <li>Improving operations at most of CPN's malls nationwide, in terms of tenants' business resumption and customer traffic. This may help it pare down discounts it gave on rental rates</li> <li>CPN's opening of its Ayutthaya mall may be postponed from 1H21 to 2H21, while schedules for other three new mall openings remain unchanged over 2H21F-2023F</li> <li>Quarterly earnings may pick up throughout 3Q20F-4Q20F. Its current FY21F P/E also looks undemanding, which should make the stock an attractive long-term investment</li> </ul>
<b>Charoen Pokphand Foods (CPF TB)</b>	38.00	29.91	<ul style="list-style-type: none"> <li>The farm unit should continue to outperform. While we expect to see a resilient recovery in broiler export volumes – on demand resumption from Europe and Japan – the Brazilian broiler products ban imposed by several nations on food safety concerns should create positive momentum for CPF's broiler unit in 2H20</li> <li>We keep our positive view for the swine unit and expect it to stay on the uptrend cycle. This is on solid demand from Asian states with lower production outputs from their key suppliers</li> <li>The pending acquisition of Tesco stores here and in Malaysia – awaiting Office of Trade Competition Commission approval in 4Q20 – could boost local sales via future hypermarket distribution channels</li> </ul>
<b>CP All (CPALL TB)</b>	77.00	24.19	<ul style="list-style-type: none"> <li>In 2H20, we expect a gradual recovery of convenience stores sales in 2H20, as a V-shaped recovery, while Siam Makro's operations remain solid</li> <li>As it has the most extensive store network, CP All may strongly benefit the new normal in terms of facilitating delivery of products and services through its developing omni-channel platform</li> <li>Still the best-in-class retailer with intact new store opening plan. Expect full-year earnings returning to pre-pandemic levels in 2021</li> </ul>
<b>Osotspa (OSP TB)</b>	49.00	35.17	<ul style="list-style-type: none"> <li>The unlocking of sales and margins from two new production lines for C-Vitt and the new beverage filling plant in Myanmar will boost Osotspa's 2H20F earnings and keep FY20F profit growth at 15%</li> <li>OSP's energy drinks market share gain locally should limit the impact of a consumption slowdown to sales in the short term. New product launches would be another topline support in 2H20F. Cost savings and production efficiency enhancement regarding its Fit-Fast-Firm corporate campaign are also intact, and the benefits are likely to accelerate in the latter half this year</li> <li>Such the business expansion and operational plans should allow OSP to keep its resilient growth outlook in a longer term</li> </ul>

<b>PTT Exploration &amp; Production (PTTEP TB)</b>	108.00	27.43	<ul style="list-style-type: none"> <li>PTT Exploration &amp; Production is a good proxy for crude oil price. We expect crude oil price to average USD45.00 in 4Q20. We expect OPEC+'s 7.7mbpd production restraint in 2H20 to have a positive impact on the global oil market. We expect delivery to recover, higher-cost producers to shut-in uneconomical wells, and the global inventory to drawdown</li> <li>70% of PTTEP's earnings are from natural gas, which is sold to PTT via long-term take or pay contracts. The natural gas price is indirectly linked with crude oil with time lag of 1-6 months. The remaining portion of its products are liquids, which are sold at the market price of crude oil</li> <li>We expect sales volume to be boosted YOY on recent acquisitions (Murphy and Partex).
